

SYSTEMATIC 01472 851091

The RADMATE System

This is a LOW COST HIGH PERFORMANCE system which:-

- Ensures that wet CENTRAL HEATING SYSTEMS work to their FULL POTENTIAL
- Will last for TWENTY YEARS or more
- Is EASY to FIT
- PAYS for itself EVERY YEAR
- HELPS the ENVIRONMENT

TEST RESULTS

Testing by Stanger, a UK accreditation service to whom we were referred by the Energy Saving Trust, established that application delivers 1°C of extra heat and savings of 1.9%. If the additional heat is not required this equates to 11.9% in fuel costs savings.

Radiator insulation and convection panel pack

THE PREMIER ENERGY SAVING WET CENTRAL HEATING SUPPORT SYSTEM

Order the Radmate Support System that :-

- SAVES MONEY
- INCREASES COMFORT
- REDUCES POLLUTION
- IS EASY TO FIT
- IS LOW IN COST

RADMATE ARE DOING THEIR BIT -ARE YOU ?

Keep Warm & Help The Environment

Save Money Save Energy Save

The **RADMATE System** comprises specially designed panels which fit on the walls behind radiators.

Available in pack form it comes complete with 10 panels (4-5 radiators*) or 20 panels (8-10 radiators*), double-sided compression tape, adhesive, step-by-step fitting video/DVD and written instructions. Each panel is 440mm wide.

**Panel Packs from
ONLY £36.00
including VAT
and delivery**

** Guide based on average experienced*

RADMATE panels have been designed to:-

- Trap still air - an excellent insulator - between the walls and the radiators preventing heat loss into/through walls.
- Distribute the heat output otherwise lost partly back to the radiator and partly back, by convection, into the room WHERE THE RADIATOR IS SITED. This is achieved by the saw-tooth profiling of the panels. Cold spots are reduced thereby increasing comfort levels.

Application of RADMATE panels increases the temperature of water in the central heating system. The result is that you will use less fuel - reducing your energy bills. Savings result for the following reasons:-

- The boiler fires less often and for shorter periods reducing wear and tear
- Warm up times are reduced by about one-third.
- As heat is delivered more evenly you will be warmer and may find that you are able to reduce radiator and/or boiler settings.

In using **RADMATE Panels** you will, in addition to **SAVING MONEY**, reduce the Carbon Dioxide emissions from your home and help combat the **GREENHOUSE EFFECT**.

Fitting of RADMATE panels to ANY SIZE OF RADIATOR without removing the radiator (except in most extreme cases or if preferred) is simple. Furthermore they are easy to fit out of the line of sight.

IT'S SO EASY...

Step 1
Your pack comes complete with panels, fixing tape, step-by-step fitting video/DVD, adhesive and full instructions.

Step 2
Applying tape to receiving surfaces is very easy.

Step 3
For radiators, other than those of standard height - 600mm - just cut, apply tape, overlap and join.

Step 4
Joining panels is a simple process.

Step 5
Panels slide into place between and beyond brackets.

Step 6
Leverage of a bamboo cane against the back of the radiator ensures panels are well secured.
